Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's response dated 10/25/2004 has been received and entered. Claims 1-10 are remain pending in the application.

Applicant's arguments dated 10/25/2004 have been considered but are moot in view of the new ground(s) of rejection as follow:

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. *It is important that the abstract not exceed 150 words in length* since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an

Art Unit: 2871

international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-2, 4-7 and 9 are rejected under 35 U.S.C 102(e) as being anticipated by Arakawa et al., US Patent No. 6,559,911.

The above claims are anticipated by Arakawa et al. figures 4 and 9 which disclose a liquid crystal display (LCD) device (20) comprising:

- . an LCD cell (30) having a liquid crystal layer;
- . a polarizing film (1);
- . a prismatic light control (6);
- . a light source device (21-24).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3, 8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Arakawa et al., US Patent No. 6,559,911, in view of Applicant's admitted prior art (APA).

Regarding the above claims, Arakawa et al. disclose the claimed invention as described above except for a light scattering pattern providing on an emission face of the guide plate, and a distance between the light guide and prism. It would have been obvious to one of ordinary skill in the art to provide a light scattering pattern providing on an emission face of the guide plate as

well as the distance between the surface light source device and the projection rows of the prismatic element being in the range of 0.5 to 5 (mm) as shown in APA (figure 2) since it is a common practice in the art to promote light from a guide plate to a liquid crystal display panel.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
